

# SHIELD YOUR HOME FROM POWER SURGES WITH BLUE COLLAR ELECTRIC

Hurricane season in Florida brings more than just wind and rain—it brings power surges, outages, and damage to your most valuable home electronics. That's why Blue Collar Electric, Palm Harbor's trusted local electricians, are proud to showcase Whole Home Surge Protection at this year's Hurricane Preparedness Expo.

## Why Surge Protection Matters

Every time lightning strikes near your home or the power grid shifts unexpectedly, a dangerous voltage spike can race through your wiring. These surges can fry your:

- Computers
- TVs & Home Theaters
- Security Systems
- Electrical Panels
- Audio Systems
- Kitchen Appliance

A single surge can do thousands in damage—but a whole home surge protector blocks the excess voltage before it reaches your devices.

## How It Works

Surge protectors detect voltage spikes instantly—then reroute the dangerous energy safely to your grounding system. The result? A steady, safe current protecting every plug in your house.

- Fast Response Time
- Lower Clamping Voltage (<400V preferred)
- High Joule Rating = Greater Protection

## Why Choose Blue Collar Electric?

- **Expertise:** Decades of experience installing surge protection in Pinellas County.
- **Certified Professionals:** Licensed and insured electricians dedicated to quality service.
- **Customer Satisfaction:** Committed to exceeding client expectations with every installation.
- **Family Run, Locally Owned & Operated**
